SUMMARY

Dynamic and results-driven ARB-registered architect and project leader with over a decade of international experience delivering high-value, technically complex developments across the UK, Europe, and the US. As Associate Partner at Foster + Partners, I lead large, multidisciplinary teams through all RIBA stages, with a focus on complex residential, commercial, and heritage-led projects.

Combining strong technical acumen with strategic project oversight, I bring deep knowledge of UK legislation, including CDM 2015 and the Building Safety Act. In response to recent legislative changes introduced through the Building Safety Act, I have actively upskilled to strengthen my competence in fulfilling Principal Designer duties. I have performed duties under the designer role as defined by both the CDM Regulations and the Building Regulations, and completed the RIBA Principal Designer Course (CDM Regulations & Building Regulations) in Autumn 2024.

I have actively mentored Part 3 candidates and supervised workplace experience since 2020, contributing to a culture of learning, design rigour, and professional development.

With a collaborative leadership style and a focus on delivering coordinated, compliant, and contextually responsive design, I support project outcomes that balance innovation, risk management, and long-term value.
